Kim and Jennifer:

The October 3rd shipment was intended to provide cigarettes for both groups for the long term study. We will also keep initiating shipments every 2-3 weeks with additional cigarettes as the inventory is dispensed.

I believe the next Group 1 return is this weekend (correct?) - if so, I would expect that they would be dispensed up to 840 packs (~280 packs per brand; allows for up to 28 packs per person for the 2 week period). That leaves enough for the Group 2 short term study needs. The October 3rd shipment will be at MDS before the Group 2 dispensation for the long term study, so I think we're covered.

Let me know if you think differently.

Thanks,  
Valerie

Jen and Valerie,

I think this amount will suffice for the Group 2 short and long term (up to Week 2) but will this amount give us enough for the ongoing returns for Group 1 of the long term??

Kim

Hi Jennifer:

After reviewing the current inventory, I think we will initiate a shipment next week (for delivery to MDS no later than 10/3) of 2 cases each of Marlboro, Marlboro Lights and Marlboro Ultra Lights (6 cases total).

Based on the current anticipated number of subjects to be enrolled in the second LNK group (clinical conduct starting October 2) for the MARL/01/03 study, you should have adequate study supply for them out of the existing inventory. By getting the additional cases to you by October 3rd, you will be in a good position to dispense the two week inventory they will need for the MARL/02/03 continuation study.

If any concerns with the above approach, please let me know ASAP. Otherwise, when Denise returns from vacation on Monday, I will ask her to initiate the paperwork to get the shipment completed.

Thanks,

Valerie

Denise-

I wanted to let you know our current cigarette inventory.

Marlboro: 1433 packs  
Marlboro Lights: 1161 packs  
Marlboro Ultra Lights: 934 packs

Will you be sending a new shipment for the upcoming October study?

Thanks!

Jen
